

Sviridov Alexander

Lead Solutions Architect & Enterprise Architect

11 years in FinTech

About Me

Specializing in large-scale digital transformation for the banking sector.
Drives business value by architecting and delivering resilient, mission-critical systems. Proven expertise in deconstructing legacy monoliths into modern microservices ecosystems, significantly enhancing scalability and reducing time-to-market. Successfully led multi-team initiatives and built expert engineering teams from the ground up at top-tier financial institutions (Sberbank, VTB, OTP Bank, Gazprombank).

Education

Ryazan State Radio Engineering University (RSREU)

Ryazan, Russia 2007 – 2013

Degree: Specialist in Mathematics
Department: Information Security
Diploma Thesis: Implementation of RSA Envision in TBInform

Tech Publications

Authored articles on Habr.com about architecture in FinTech (translated versions: linkedin articles)

- About RBS in OTPBank
- About PCIDSS
- About Bank Architecture

Professional skills

Architecture & Strategy:

Architecture from Scratch, Microservices, Service Mesh, Event-Driven Architecture
Architecture Frameworks: TOGAF, ATAM, C4 Model, ArchiMate
Distributed & High-Load Systems, Fault-Tolerance (99.99%), High Availability
SDLC, Agile, Scrum

Technologies & Platforms:

Kubernetes, Docker, OpenShift, AWS
Apache Kafka, RabbitMQ, IBM MQ, REST API, SOAP

Programming & Databases:

Languages: Java, Kotlin, Python, Shell
Frameworks: Spring (Boot, Cloud, etc.)
Databases: PostgreSQL, Redis, Elasticsearch, Oracle DB
Data Tools: Apache Spark, Hadoop, MinIO, Ceph
CI/CD: Jenkins, TeamCity, GitLab CI

Professional Experience

OTP Bank — 04. 2023 - Present

Lead Solution Architect

- Lead a team of solution architects, providing architectural governance for 20+ systems, including internet banking and CRM.
- Led the greenfield implementation of a new internet bank, including vendor selection, end-to-end solution architecture design, and architectural oversight throughout delivery.
- Design fault-tolerant, geo-distributed solutions with high availability (99.99%) and seamless integration with internal systems.
- Drive migration of legacy systems to microservices architecture, improving scalability and time-to-market.

Professional Experience

Gazprombank 06.2022 - 04.2023

Lead Solution Architect

- Enforce bank-wide architectural standards and apply TOGAF for governance and security issue resolution.
- Design architecture for new credit products; led implementation of a blockchain-based product.
- Introduced Redis and MinIO to improve performance and object storage.
- Lead migration of microservices to OpenShift and redesign into service mesh.
- Manage development and production deployment for 10 SME products.

VTB 12.2020 - 06.2022

Team Lead (Solution Architect)

- Designed end-to-end solution architecture from scratch for SME deposit account applications, including high-level design and microservices with service mesh.
- Defined integration patterns (Kafka, MQ, REST, SOAP) and technology stack (Java 11, Spring, PostgreSQL, Redis, React, Kotlin, Swift).
- Introduced CI/CD and Agile practices (TeamCity, Nexus, BitBucket, SonarQube) to accelerate delivery.
- Led a cross-functional team of 15 engineers, combining architectural governance with hands-on technical leadership; delivered first release in five months, one month ahead of schedule.

Sberbank 04.2016 - 12.2020

Developer ⇨ Solution Architect ⇨ Team Lead

- Designed end-to-end architecture for a bank loan application (offline POS credit products), including fault-tolerant integration with core banking systems and PCI DSS processing; led successful market launch.
- Architected an integration library embedded into microservices, standardising message queue/topic connectivity and serialisation/deserialisation.
- Introduced Agile and DevOps practices (GitFlow, CI/CD, automated testing) achieving a 10x reduction in release defects.
- Led cross-functional teams and contributed to high-load integration systems based on Apache Camel, Kafka, and IBM MQ.

RSREU ⇨ TBInform ⇨ 9-Bits 04.2009 - 04.2016

Developer ⇨ Information security specialist

- Developed a diverse portfolio of applications including mobile apps
(Android/iOS), an online game, and security systems.
- Administered cloud infrastructure (AWS) and automated deployments using Jenkins and Puppet.
- Conducted security analysis, developed a processing protocol.
